-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1711

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-22 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over McBain.

See Paper No. 051305, paragraph 4.

4. Applicant's arguments filed 8-30-05 have been fully considered but they are not persuasive. The applicants argue that the gel coat resin produced from their method would be different from that produced by a prepolymer method, and that McBain teaches against their method. They argue that the prepolymer method would yield a homogeneous product. This isn't true, unless the prepolymer is made with a very large excess of diisocyanate, such as at an NCO/OH of 10/1, and then the excess unreacted diisocyanate is removed. When the prepolymer is made at an NCO/OH ratio of 2/1, a variety of compounds would exist in the product, including unreacted diisocyanate. According to Bristowe (bottom col. 5 – top col. 6), three methods of making urethane acrylates results in about the same product.

Art Unit: 1711

5. Claims 23, 24 and 26-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over McBain in view of Bristowe, Craven, Sadvary and Boisseau.

See Paper No. 051305, paragraphs 6-10.

6. Applicant's arguments filed 8-30-05 have been fully considered but they are not persuasive. The amended independent claim is directed to curing at a temperature lower than that shown by McBain. The coating would be the same regardless of the curing temperature. Curing at a lower temperature would just take longer. The Craven, Sadvary and Boisseau references were all cited to show that it's known to use a combination of benzotriazole and hindered amine stabilizers in a variety of similar coatings. The applicants argue that none of these references are exactly the same as their coating, and they discuss how each differs. McBain discloses both stabilizers and the other references show that the combination works in a variety of coatings.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rachel F. Gorr whose telephone number is 571-272-1072. The examiner can normally be reached on Mon., Tues., Thurs., Fri., from 7:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jim Seidleck can be reached on 571-272-1078. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
